

Dear Parent/Guardian,

Senate Bill 530 requires that the FITNESSGRAM physical fitness assessment be administered to all students in grades **3-12**. FITNESSGRAM is a health-related fitness assessment developed by The Cooper Institute for Aerobic Research and is a research-based criterion referenced test.

IISD considers FITNESSGRAM a quality assessment for three reasons:

1. FITNESSGRAM establishes a baseline of a healthy fitness zone from which students can set goals and check their progress (non-competitive) to plan for lifelong physical activity and to maintain and improve their fitness level. Health-related fitness assessment measures students' aerobic capacity, muscular strength/endurance, flexibility and body composition.
2. FITNESSGRAM provides recommended activity program options that will help students reach healthy fitness zones in those areas where they need to improve.
3. FITNESSGRAM does not place an emphasis on skill or sports-related fitness such as speed measured by an individual's 40 yard dash time. It does not compare students to other students.

FITNESSGRAM tests all students regardless of age, gender, or ability. Students are encouraged to be self-aware of health-related fitness and take responsibility by setting personal fitness goals. When students focus on the process of doing their personal best, a more positive lifelong impact is achieved.

IISD believes by providing you and your child with this health-related fitness information, you can lead your child toward a healthy lifestyle. A healthy student is better prepared to learn and perform in all aspects of life.

Sincerely,

Philip Crawford

Itasca Elementary

Frequently Asked Questions About FITNESSGRAM

1. Why is fitness testing important to me?

The FITNESSGRAM physical fitness assessment is based not on athletic ability, but on good health. No matter what your career path, you will live a happier, more productive life if you are healthy--and physical fitness is vital to overall health. FITNESSGRAM provides accurate and reliable information about your physical condition and how it can be improved.

2. Can I “fail” the FITNESSGRAM test?

No. FITNESSGRAM is a tool to help you determine your fitness needs and guides you in planning a personalized physical activity program. The test will not affect your grades in any way.

3. Will my scores be posted or be made public?

No.

4. Will my results be compared to other students?

No. FITNESSGRAM uses Healthy Fitness Zones (HFZ) to determine your overall physical fitness. HFZs are not based on class averages or any other peer comparisons. The standards are set specifically for boys and girls of different ages using the best available research. If your score falls within the HFZ, it means you have achieved the recommended level of fitness for your age. If your score falls below the HFZ, you should engage in activities that will help you improve.

5. What are the FITNESSGRAM Test items?

There are six test items:

- Either the Mile Run, PACER (20 meter shuttle runs) or the Walk Test (measures aerobic capacity)
- Push-ups (measures upper body muscular strength/endurance)
- Curl-ups (measures abdominal muscular strength/endurance)
- Either the Back Saver Sit and Reach or Shoulder Stretch (measures flexibility)
- Trunk Lift (measures trunk extensor strength and flexibility)
- Body Mass Index (measures body composition: appropriateness of weight relative to height)
